

US 89

Preservation

1000 N to Eagle Ridge Drive

July 20, 2017

Current Work

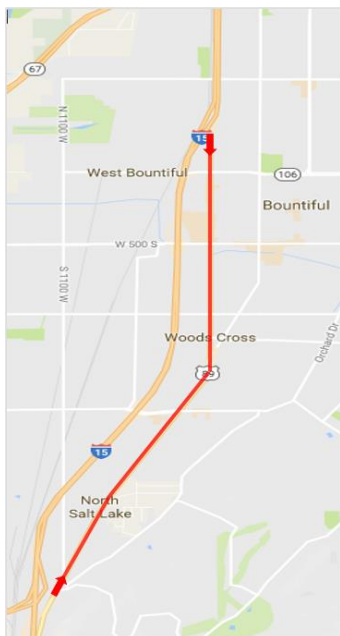

Installation of approximately 23 pedestrian ramps is complete. Work on pedestrian ramps will continue to be the focus of July's efforts.

Construction on pedestrian ramps will generally take place Monday through Friday during daytime hours. Some evening, Saturday or holiday work may also take place. Most work will be staged on side streets so traffic along US-89 isn't impacted.

Crews have just finished pouring and leveling concrete.

Please be mindful of wet concrete and use caution when approaching sidewalk closures.

Project Overview

UDOT will be performing asphalt maintenance on a four mile corridor on US-89 through Bountiful, West Bountiful, Woods Cross and North Salt Lake (from Eagle Ridge Drive to 1000 North/I-15). The pavement will receive a micro-surface treatment, which will extend the life of the asphalt.

The project will also be upgrading approximately 100 sidewalk pedestrian ramps to become compliant with federal Americans With Disabilities Act (ADA) standards.

Work on pedestrian ramps began at the south end of the project limits, and crews plan to work their way north. Construction work is scheduled for completion by the end of August.

Schedules are subject to change due to materials availability or weather.

What's Coming Up

In August, crews will lay a micro-surface over existing asphalt. This work will take place overnight from 7 PM in the evening until 7 AM the following morning. Crews will work Sunday through Saturday for approximately two weeks. There is potential for construction-related congestion during this portion of the project, so motorists would be wise to plan ahead and consider alternate routes if travel is time-sensitive.

What can I expect during construction?

Project impacts may include:

- Sidewalk closures
- Noise, dust, vibrations
- Some right hand turn lanes on US-89 may be temporarily closed
- Some driveways may have access impacted while work takes place and while concrete cures
- Minor traffic delays, lane shifts and lane closures (this will take place in early August and will occur during overnight hours)

Workers ensure that concrete is level.
