

# 400 North

## IMPROVED

Bountiful

### THE PROJECT WILL:

- Reconstruct the roadway in concrete for a longer pavement life and less future maintenance
- Add radar detection at the 400 North/200 West intersection to improve traffic flow
- Add new curb, gutter, and some sidewalk and driveway approaches from 500 West to Main Street

### PROJECT DESCRIPTION

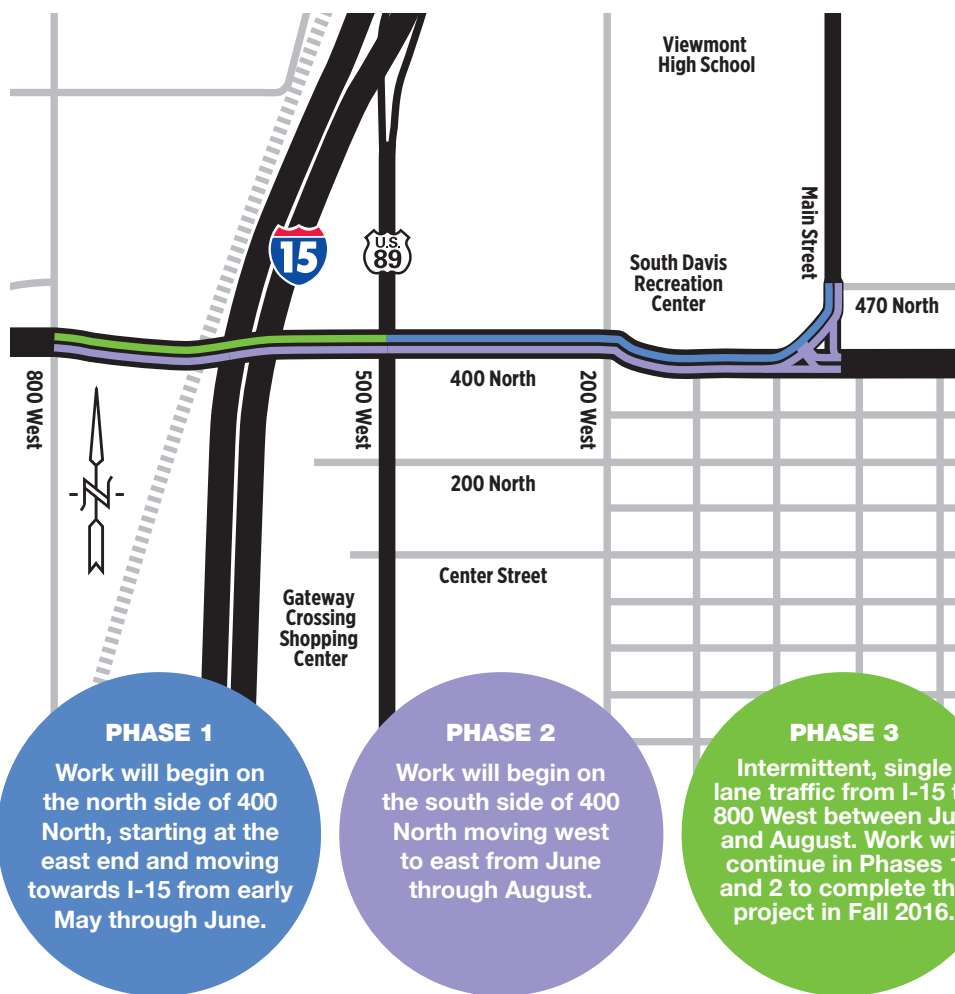

This summer, the Utah Department of Transportation (UDOT) is working to improve the roadway surface on S.R.106 (400 North) in Bountiful. The 400 North Improvements project will upgrade the pavement, reducing the disruption of maintenance and its overall cost by replacing asphalt with concrete.

### PROJECT TIMELINE

Construction will begin in early May of 2016 and is scheduled for completion in the Fall of 2016. This aggressive construction schedule was designed to minimize impacts to the public over the long term. Please see graphic to the right for project timelines and phasing.

### IMPACTS

400 North will be reduced to one lane in each direction with turn lanes at the major intersections during construction. Motorists should be prepared for significant delays and use alternate routes when possible. Area residents and businesses can expect short-term intermittent driveway interruptions and construction work during the day and at night to complete this project in 2016. Motorists can reduce delays by using alternate routes, avoiding peak travel times, telecommuting, carpooling or combining trips.

**PHASE 1**

Work will begin on the north side of 400 North, starting at the east end and moving towards I-15 from early May through June.

**PHASE 2**

Work will begin on the south side of 400 North moving west to east from June through August.

**PHASE 3**

Intermittent, single lane traffic from I-15 to 800 West between July and August. Work will continue in Phases 1 and 2 to complete the project in Fall 2016.

### PROJECT INFORMATION

This project has a dedicated public information team to work with area residents and stakeholders. Please feel free to contact us about this project. We are here to help! Updated information is available at [www.udot.utah.gov/go/400north](http://www.udot.utah.gov/go/400north), by emailing [400North@utah.gov](mailto:400North@utah.gov), or calling the project hotline at **888-556-0232**, ext. 2.
