

BOUNTIFUL CITY LIGHT AND POWER DISTRIBUTION LINE REBUILD

Dear Customer,

In order to keep up with the ever increasing demands for electrical power, and to help ensure a more reliable power system for Bountiful City, we find it necessary to re-build and upgrade our power distribution lines.

Hunt Electric will be working for Bountiful City in your area starting on March 14th until April 12th. We may need to access poles and wires through your yard. In order to maintain reliability during severe weather trees may need to be trimmed away from the wires and the working area for poles.

Below is a map of the primary line construction area, it is located on 200 West between 1800 South and 2350 South. However, some work related to this project will take place outside of this area.

As we are working, an interruption in power may be necessary. We will try to keep the power interruptions as brief as possible and will try to notify you prior to any power outage. However, there may be instances where brief power interruptions lasting 5-10 minutes may happen without notification.

We will do everything possible to expedite this project. We apologize for any inconvenience. If you have any questions please call Luke Veigel at 801-298-6070.
