

From Clean Streets to Clean Waterways

Keeping dirt and debris out of our streets isn't just about aesthetics – it's about ensuring Bountiful remains a delightful, secure, and eco-friendly place. Here's why it's important, and how each one of us can make a positive impact:

1. Road Safety Begins with Us

Clean streets are safer streets. Loose gravel, leaf piles, or fallen branches can lead to accidents, so let's work together to keep our roads free from obstructions and guarantee safer journeys for everyone.

2. Avoid Flooding Fiascos

Clogged drains are often the culprits of flooding. When dirt and debris obstruct our storm drains, it creates a jam for rainwater and water backup in the streets. By keeping these drains clear, we can help prevent inconvenient and costly flooding incidents.

3. Protecting Our Precious Waterways

Beyond our roads, our actions have a broader impact on the environment. Any debris on the streets is a short trip away from our precious public waters: the creeks, Farmington Bay and the Great Salt Lake. No one wants to see our rivers and streams cluttered with trash. Let's be mindful of how our actions can protect our natural resources.

What Can You Do?

- **Sweep Your Gutters:** A simple sweep outside your home can make a big difference in keeping our streets clean.
- **Proper Disposal:** Ensure your trash makes it into the bin, not the wind.
- **Educate and Inspire:** Share these tips with your friends and neighbors. The more people involved, the more significant the impact.

By making a commitment to keep streets clear, unblock our drains, and preserve our surface waters, we can help Bountiful continue to be a safe, welcoming, and environmentally responsible community.

Thank you for being a part of the solution!
