

## Bountiful City Light and Power

### Pole Inspection Notification

---

**SUBJECT:** Osmose Utilities Services, Inc.

Dear Customer,

Bountiful City Light & Power has contracted with Osmose Utilities Services Inc. to perform utility pole safety inspection and restoration services throughout the entire City. The pole testing is required to ensure that the electrical system is in a safe and reliable operating condition.

Osmose crews will be working in the area to evaluate the condition of Bountiful's poles and to perform any necessary maintenance. We ask that you allow Osmose personnel access to all Bountiful City Light & Power electric facilities that are located within or adjacent to your property. Once on-site, the inspection process takes approximately 10-30 minutes per pole but can occasionally extend up to two hours when restoration activities are required.

We apologize for any inconvenience the completion of this important process may cause. **If you have any additional questions about the pole maintenance program please contact Osmose at 518-795-0813.** You may also acquire more information by visiting their website at [www.osmoseutilities.com](http://www.osmoseutilities.com).

You may also contact Luke Veigel at Bountiful City Power Department, at 801-298-6072.

Thank you for your patience and understanding,

Allen Ray Johnson  
Director
