

US 89

Preservation

1000 N to Eagle Ridge Drive

August 9, 2017

Current Work

Construction crews made great progress this past week, installing a new layer of asphalt on US-89 from Eagle Ridge Drive north to approximately 500 South. Asphalt work will be ongoing through the end of the week, and will be taking place from 500 South north to the I-15 entrance.

Asphalt paving will still begin nightly at 7:00 p.m. and take place until about 7:00 a.m. the following morning. US-89 will continue to have lane closures and traffic control devices in place. Traffic will be open, but will be restricted to one lane in each direction.

Microsurfacing work is in progress on US-89 at mile post 388.

Access to turn lanes, median and driveways may be temporarily blocked for a couple of hours as equipment comes through and the asphalt treatment cures. Some delays and congestion are expected, so you may want to plan travel around construction.

Please refrain from driving into work zones and inside barricaded areas. Cure time is necessary before opening the surface to traffic. Access within these areas prior to proper curing can result in damage to your vehicle.

Construction on pedestrian ramps and sign replacement will continue during the daytime. Most work will be staged on side streets so traffic along US-89 isn't impacted. Please be mindful of wet concrete and use caution when approaching sidewalk closures.

Traffic Alerts

Impacts to the following areas are anticipated.

US-89 500 South to I-15 entrance (August 9-12)

- US-89 traffic reduced to one lane in each direction
- Traffic control devices and flaggers will be in place

- Temporary and intermittent closures of right and left turns, median and driveway access will be in place (approximately a two-hour period)
- Delays and congestion are likely

**Dates are subject to change based on weather or materials availability.*

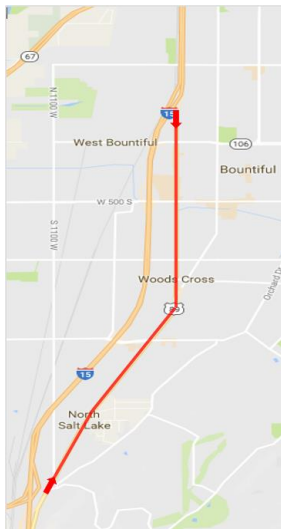

What can I expect during construction?

Project impacts may include:

- Sidewalk closures
- Noise, dust, vibrations
- Some right-hand turn lanes on US-89 may be temporarily closed
- Some driveways may have access impacted while work takes place and while concrete and asphalt cures
- Minor traffic delays, lane shifts and lane closures on US-89 during overnight hours

Sidewalks will be closed in areas where crews are working.

Project Overview

UDOT will be performing asphalt maintenance on a four mile corridor on US-89 through Bountiful, West Bountiful, Woods Cross and North Salt Lake (from Eagle Ridge Drive to 1000 North/I-15). The pavement will receive a micro-surface treatment, which will extend the life of the asphalt.

The project will also be upgrading approximately 100 sidewalk pedestrian ramps to become compliant with federal Americans With Disabilities Act (ADA) standards.

Work on pedestrian ramps began at the south end of the project limits, and crews plan to work their way north. Construction work is scheduled for completion by the end of August.
